USER MANUAL

9 inch Anti-Glare Screen Protector

Part No. AM9AGS

SUITABLE FOR

AM905D 9 inch tablet style car head unit. The anti-glare surface cuts glare and reflections for easier viewing in bright light. Check it matches your screen before you start.

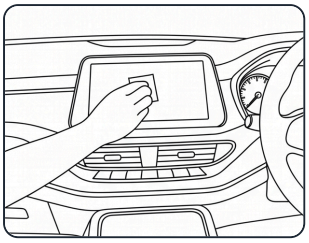
BEFORE YOU START

Fit in a clean, dust-free spot, out of direct sun. Switch the head unit off and let the screen cool.

IN THE BOX

- 1x Screen Protector
- 1x Microfibre Cloth
- 1x Cleaning Wipe
- 1x Dust Absorber
- 3x Alignment Guide Stickers
- 1x Smoothing Squeegee

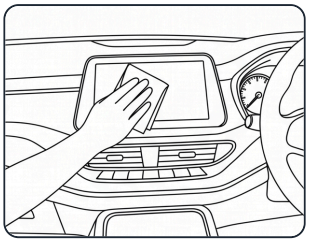
FITTING INSTRUCTIONS



1

Wipe with the cleaning wipe

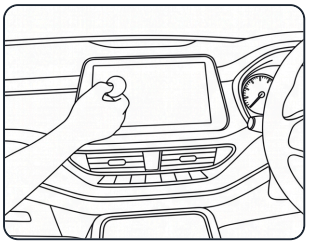
Wipe the screen clean with the cleaning wipe to remove fingerprints and oil.



2

Dry with the microfibre cloth

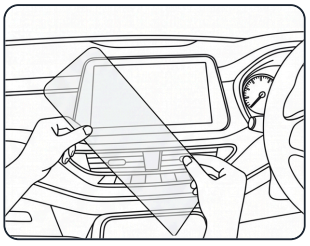
Wipe away any water stains or moisture with the microfibre cloth. The screen must be completely dry.



3

Remove the dust

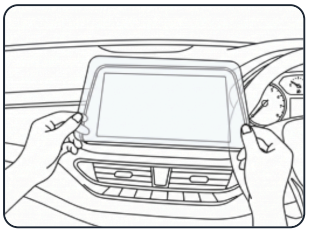
Use the dust absorber to lift any remaining dust or lint off the screen.



4

Peel off the protective film

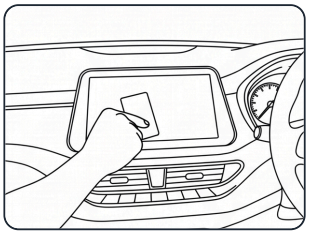
Peel the protective film from the adhesive side. Hold the protector by the edges and do not touch the adhesive.



5

Align and install

Align the protector to the edge of the screen, making sure it does not cover the microphone, then lower it slowly so it settles evenly.



6

Smooth out the air bubbles

Use the smoothing squeegee to push air bubbles from the centre out to the edges.

WARNINGS

- Do not fit the protector while driving. Fit it with the vehicle parked.
- Do not use heat or harsh chemicals on the screen or protector. Use only the supplied cleaning wipe.
- Clean the protector with the supplied microfibre cloth only. Rough cloths can mark the anti-glare surface.
- Do not press hard on the screen or use sharp tools. They can damage the screen or the protector.
- Do not touch the adhesive side. Fingerprints and dust will leave marks under the protector.
- If dust is trapped under the protector, lift it gently and remove the dust. Do not reuse a protector that is creased or has lost its grip.
- Check that touch response and any reversing camera or other on-screen functions work normally after fitting.
