

ABT118 Quick Pairing Guide

TURN ON	Press Red Key for 8 seconds until the blue LED starts flashing
TURN OFF	Press Red Key for 8 seconds until the blue LED stops flashing
PAIRING WITH ANOTHER RIDER	Make sure both units are switched off. Hold down RED Key on both units for around 10 seconds or until the LED on both units flash alternately RED and BLUE . Once both units are flashing, short press the RED key on one unit only (this will become the master and the other will be a slave unit). Wait for 3 seconds, the LED will flash BLUE the units are now paired. press RED key to communicate, press again to hang up.
PAIR WITH BLUETOOTH PHONE	From unit off. Hold down RED Key on unit for around 10 seconds or until the LED flashes alternately RED and BLUE . On the phone switch Bluetooth on and "Search for Bluetooth device" The ABT118 will appear as "Motor Phone" once selected, key in pass code 0000. Phone will confirm pairing. The ABT118 will auto answer after 6 seconds. Press Green key to answer immediately, press again to hang up. Long press to Reject
PAIR WITH 2 OTHER RIDERS	Follow same directions as PAIRING WITH ANOTHER RIDER with the Slave of the first pairing becoming master of the third unit. Then follow the same directions again to make the third unit master of the first. Once all three are paired, pressing the RED Key will speak to the first person. To speak to the second person press the Red key for longer (will hear two beeps) wait for a couple of seconds to connect. To speak to the first person again, press RED key for longer (will hear one beep) and wait a couple of seconds to connect or press RED key once to hang up and again to connect again.
