

TEMPLATE To suit VE COMMODORE 06 onwards

Cut out according to the speaker size.

Drill mounting screw holes ϕ 3.0 to ϕ 3.5mm.

INSTRUCTIONS:

1. Remove the original parcel shelf from the vehicle.
(To remove the shelf the back seat will have to be removed first)
2. Place the template on the parcel shelf aligning the outside edge of the template to the similar shaped groove on the parcel shelf.
3. Mark out the mounting hole positions then drill the 3 to 3.5mm holes in shelf. (4 holes in total)
4. Mark out the opening for the speaker to play its sound through and then cut out this opening carefully so as not interfere with the mounting holes and making sure not to go outside the limits of the grill.
5. With the grill aligned and in place on the top side of the shelf, fasten it to the shelf using 4 self tapping screws from the under side of the shelf through the pre drilled mounting holes you made during step 3.
6. Mount your speakers to the pre cut mounting positions on the car's inner body. There may be a thin steel plate covering the holes. However this plate can be easily removed as it is only held in with to small spot welds .
(Do not under any circumstances cut any metal in the cars body.
If you need a larger opening than the one provided for 6x9 inch speakers etc you should use a mounting spacer over the factory provided holes.)
7. After both sides are finished re load the parcel shelf back into the vehicle over the installed speakers.
