**CHOKING HAZARD -**  
Small parts not for Children  
under 3 years.

To avoid quad-copter damage and  
injury, please read the user manual  
carefully before flying.

## Laws & Regulations on flying your drone (AUS)

You need to be able to see the aircraft, with your own eyes (eg, without binoculars) at all times.  
**Don't let it get too far away from you!**

You need to fly the aircraft so it isn't a hazard to other aircraft, property, and people.  
**That means not flying it over areas where there are people.**

**Fly the aircraft in daylight only.**

**Give way to all other aircraft.**  
You don't want your aircraft destroyed in a collision with a bigger aircraft, or be responsible for damaging it, or for putting people's lives at risk.

**You cannot fly your aircraft higher than 120 metres (400 feet) above ground level.**

**You cannot fly closer than 5.5 kilometres from an airfield.**  
You cannot fly in controlled airspace without a clearance from Air Traffic Control. For more information, see the CASA web site.

**It's illegal to fly for money or economic reward unless you have correct certification from (CASA)**
