Quick start guide

Thank you for purchasing the Gator GC100. This Quick Start Guide will help you learn the basics of using the action camera. For a more detailed manual please refer to our website at www.gatordriverassist.com

Inserting Micro SD Card
Note: Please choose a branded Micro SD card and format it on computer before use. The camera supports up to 32GB, Class 10 (Non Ultra).

Installing and removing battery
1. Slide latch across and lift battery cover up to open.
2. Correctly install battery into camera as indicated by +/- symbols and direction of arrows marked on the battery until it's in place.
3. Replace cover
4. To remove battery pull battery door latch upwards

Charging
1. Charging can be done by either connecting the camera to a computer or power adapter (not included)

Getting Started
Press & hold the mode button on the front of the camera for 3 - 5 seconds to turn it on. Press the mode button to cycle through camera modes.
1. Video mode- to record video
2. Photo mode- to take pictures
3. Playback mode- to view videos and pictures
4. Setup menu.

Video mode
When in recording mode symbol 📷 is displayed on top of screen, press ◯ red shutter button to start and stop recording. A red circle appears next to this symbol and flashes whilst recording.
Photo mode

When in photo mode symbol is displayed on top of screen, press red shutter button to take a picture.
Playback mode

Use the up & down buttons to cycle through video and picture taken on the device. Press the red shutter button to select & play. For file storage & playing after you are done recording, use a the USB cable provided to export the videos and pictures onto a computer to play. Or you can take the Micro SD card out and access the image data with a card reader.

Setup Menu

Press the up and down buttons on the side of the camera to cycle through setup settings. Press the shutter button to select setting. Use up and down arrows to select sub setting and press shutter button to confirm selection.

Micro SD Cards:

This camera is compatible with 8GB, 16GB, and 32GB capacity microSD, microSDHC, and microSDXC memory cards. You must use a microSD card with a Class 10 speed rating. We recommend using brand name memory cards for maximum reliability in high-vibration activities.

Charging the battery:

If recording is occurring when battery reaches 0%, the camera will save the file and power OFF.

To charge the battery:

1. Connect the camera to a computer or USB power supply.
2. The Charging Status Light remains ON while the battery is charging.
3. The Charging Status Light will turn OFF when the battery is fully charged.

Charging time: 3.5 hours
