MULTICOLOUR USB STRIP LIGHTING

LED1 USER GUIDE

# CONTENTS

- 1 X 1 Metre RGB SMD LED Strip
- 1 X Joiner
- 1 X Alcohol cleaning wipe

# FEATURES

- 1 Metre RGB SMD LED Strip
- In-line remote control
- Low power consumption
- Adjustable light intensity (Dimmer)
- Light transitions (Flash, Strobe, Fade, Smooth - speed controlled using brightness buttons)
- 20 Colour presets
- Water resistance rating IP54

# INSTALLATION & JOINING STRIP WIRES TOGETHER

Select the appropriate mounting position, make sure the power supply can be plugged in without excessive tension on the cable. LED strips can be trimmed to length by cutting at copper join. See picture below

**NOTE: that you do not cut the wrong end of the LED Strip.**

Plug the remote onto the strip lighting, then plug the USB end into the USB powered device and test before adhering to a surface.

Use a joiner with extension cable to connect 2 strips together. Arrows on extension ends show orientation for joining, see pic 1. For bear end connection use joiner as displayed in pic 2

## ADHERING TO A SURFACE

To stick the LED strip onto a surface, simply peel off the adhesive backing layer from underside as shown below. Before installation of the LED strip please ensure that you wipe the surface with an Alcohol cleaning wipe to make sure it is free of dust and grease. Press and hold the LED in position for at least 60 seconds for maximum adhesion.

**NOTE: Although LED Light Strips can be installed in curved and irregular spaces, avoid sharp bends or bending on the solder joints as you could damage the light strip.**

## USING THE REMOTE

### DEMO MODE

Press for a demonstration of modes, colour & speeds

### SPEED MODE

Press to access 8 levels

### BRIGHTNESS MODE

Press to access 8 levels

### LONG PRESS

To turn ON/OFF

### COLOUR MODE

Press to change colours

## WARNINGS

- This product is meant for indoor use only
- Make sure that the LED strip has been installed correctly before use. If in doubt, contact a qualified electrician
- Do not connect the Power supply and LED strip when they are still in the package
- Do not install near any heat sources to prevent damage to the lighting fixtures from high temperatures
- If the product, cable, LED connector or controller is damaged, contact the retail store you bought this product from before use
- Please do not use anything other than the accessories provided in the package otherwise the product may result in fire, electric shock and/or injury
- Although the LED strip is quite flexible, the smallest possible angle radius is 6 mm
- Do not press too hard on the LED Strip as it may damage the LED's and other components.
- Do not damage the wire connections on the circuit board
- Disconnect the product from the power supply during installation
- This appliance is not a toy. Do not let children play with it.
