

ASSEMBLY INSTRUCTIONS
Model SAR544/BB/OP

CAUTION

Do not use any power tools for tightening any of the fastenings on this A/V stand

1. From the components supplied please locate the Glass shelf with the threaded metal inserts. Lay this shelf down on a clean flat surface such as a carpet etc , with the threaded holes facing upward
2. Next locate and screw in the 2 threaded rods (3) into the two large threaded discs
3. Insert the 2 short metal spacers (4) by threading them through the threaded rods (4)
4. Over these spacers then install the second glass shelf by passing the threaded rods through the holes in the glass
5. Now insert two of the long metal spacers followed by the next glass shelf
6. Repeat steps 4 & 5 to install the remaining shelves
7. After the last shelf is installed thread the two small spacers (7) through the threaded rods and then screw in using the two threaded metal discs (8). At this stage do not fully tighten these
8. Next install the 2 sections cable management /rear support assembly as per the diagram using the supplied hardware making sure to secure each glass shelf to the cable management section using the supplied hexagonal key and the grub screws supplied (9)
9. Tighten all fastenings now including the two threaded metal feet.
10. Now turn the stand over right side up.
