USERS' MANUAL

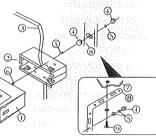

Please read this users' manual carefully!

Installation Precautions:

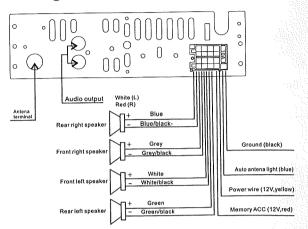

- 1.To avoid damage, this unit should be installed by a professional installer were possible.
- 2.Please refer to the users' manual for electrical wiring instructions, incorrectwiring will cause damage to the unit that is not covered by warranty.
- 3.Only connect the wiring connector to the unit after all connections of the unit are made and are insulated.
- 4. You must Insulate all exposed wires to avoid short circuits.
- 5.All loose wires should be raped into a neat loom before the unit is inserted into the dash.
- 6. The unit is designed for 12v-15v-negative ground systems only, When installing into a 24Volt system (Large Truck) a voltage reducer must be used.

2.half cabinet
3.dashboard
4.hex nut
5.spring washer
6.M5x15 hex bolt
7.car body
8.rear mounting backset
9.Tapping screw 5x15

Wiring Connections:

1. After confirming your power, Accessory and Ground wires, it is advised to disconnect the cars battery to avoid shorts during the installation process. We highly recommend he use of Prefabricated wiring harnesses to avoid incorrect wiring and to save time.

2. Please note that the yellow wire is connected to a non interrupted power source if a suitable wire can not be found behind the head unit installation location this can be sourced directly from the battery's positive terminal 3. For best performance a quality 40hm speaker system is required, poor speaker quality will result in poor sound

quality.

SPECIFICATIONS:

TM.	tunner:	
LIVI	tumut.	

Frequency range:	87.5-108MHz
Medium frequency:	
Noise sensitivity:	
Radio sensitivity:	10dB

AM tunner:

Frequency range:	522-1710kHz
Medium frequency:	455kHz ±5%
Noise sensitivity:	
Radio sensitivity:	40dB

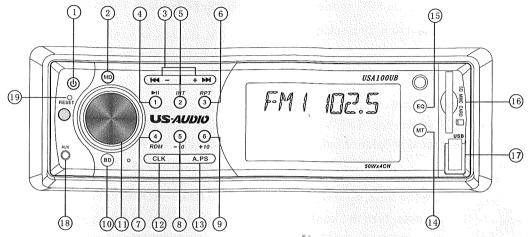

USB/SD:

Frequency response	20Hz-20KHz
Signal/Noise ratio	>50db
Harmony distortion T.H	.D<3%(1KHz)

Others:

RMS Power Output	4x50W
	12-15VDC minus earth
Speaker impedence	
	177x115x50mm

Front Panel Controls and Functions

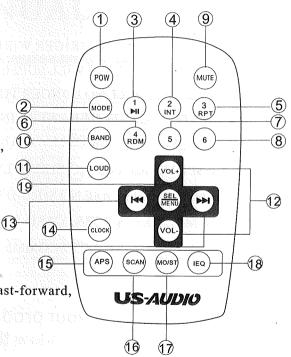

- 1.POW: Power on/off.
- 2.MD: Mode swift.
- 3. " which is button: On radio mode, Press it for AUTO station search; holdit for manual station search. On MP3 mode, hold it for fast forward/ fast backward; press it for the last or next song
- 4. 1/▶ button: Radio(AM/FM) memory / on play mode, press it for pause
- 5. 2/INT button: Radio(AM/FM)memory/on play mode, press it for browse
- 6. 3 / RPT button: Radio(AM /FM)memory / on play mode, press it for repeat play
- 7. 4/RDM button: Radio(AM/FM)memory/on play mode, press it for random play
- 8. 5 button: Radio memory button / on MP3 mode, press it for 10 tracks backward, for instance, if track number 25 is played, press it to play track number 15.

- 9. 6/+10: Radio Memorybutton/On MP3 mode, press ittogo10 tracks forward, for instance, if track number 25 is played, press it to play track number 35.
- 10.BD: Band Swift.
- 11.Multi function button
 - ★Turn it for volume adjustment.
